Hi David,

Ensuring - is there no more active work going on at the US Oil Recovery Superfund post-Harvey? The last update I'm seeing is for 9/14; any updates?

Deadline is 3pm EST today.

Thanks as ever,
Jackie

Hi Jackie,

All 43 Superfund NPL sites in the hurricane affected area have been assessed. Of these, 42 sites have been cleared. The San Jacinto Waste Pits site requires additional follow up. The Responsible Parties are continuing cap repairs and maintenance activities under EPA oversight. The repair includes manual placement of armor rock that is placed on a pontoon and positioned over the deficient areas. The work is focused on the northwest corner of the temporary cap where the EPA dive team conducted sampling. All work is being conducted in accordance with the approved work plan and under EPA oversight. Post-hurricane Superfund site summaries based on preliminary data results are being published (www.epa.gov/hurricane-harvey) and

quality assured data should be available in about 2 weeks.

David

Hi all,

What were the results of the dive team's check of the San Jacinto Waste Pits? Any problems?

My deadline is no later than 3pm EST today.

Thanks much,
Jackie
